"Maximum number of result rows retried per report was exceeded 128,000"

This message means the report you have generated has more than 128,000 rows of data. Please keep in mind that, although the tool does allow for tabular level reporting and exporting, the tool was not designed to handle data dumping of reports — meaning you are attempting to process large amounts of data at one time. The size of your account will determine how much data you are able to process at one time. The same report may not work for multiple accounts, depending on the volume of transactions they process through American Express Global Business Travel. Therefore, please be prepared to reduce the size of your reporting by doing one or all of the following:

- 1 Select smaller date ranges (e.g., quarterly vs. year or monthly vs. quarterly, depending on the size of the account).
- 2 Reduce the number of client IDs (e.g., group them by region: EMEA, JAPA, NA).
- **3** Reduce the number of attributes/metrics.
- 4 Add filter conditions under the "Advanced Filter" section.
